Computers & Security, 19 (2000) 176-182

Subject Index for Volume 18

Abuse
computer crime and abuse: a survey of public attitudes and awareness 715

Access
developing firewall technology: Hardwall - white paper 471
enforcing network security: a real case study in a research organization 533

Analysis
a structured symmetric-key block cipher 134
Shannon, TESPAR and approximation strategies 445

Approximation
Shannon, TESPAR and approximation strategies 445

Artificial neural networks (ANN)
Shannon, TESPAR and approximation strategies 445

Attack
E-mail can seriously damage your health 396
network based intrusion detection: a review of technologies 671
simulating cyber attacks, defences, and consequences 479
state-of-the-art ciphers for commercial applications 67

Audit
computer security - what should you spend your money on? 322

Authentication
encryption - do or die for UK business 312
password authentication schemes with smart cards 727
trusted third party services for deploying secure telemedical applications over the WWW 627

Awareness survey
computer crime and abuse: a survey of public attitudes and awareness 715

Banking
telephone tales 120

Bell-shaped curve
the bell tolls for the bell-shaped curve 565

Biometrics
generating user-based cryptographic keys and random numbers 619

Block ciphers
a structured symmetric-key block cipher 134
state-of-the-art ciphers for commercial applications 67

Blue boxing
telecommunications crime - part 2 683

British Standards
computer security - what should you spend your money on? 322
the revised version of BS7799 - so what's new? 307

Business continuity
survival is not compulsory: an introduction to business continuity planning 35
Y2K contingency planning: taking BCM into the 21{S}st{s} century 693

Certification
certificate interoperability - white paper 221
firewall certification 165
trusted third party services for deploying secure telemedical applications over the WWW 627

Ciphers
generating user-based cryptographic keys and random numbers 619
state-of-the-art ciphers for commercial applications 67

Code of practice
the revised version of BS7799 - so what's new? 307

Coding
Shannon, TESPAR and approximation strategies 445

Coercive power
risks in low trust among trading partners in electronic commerce 587

Communications
malware: Troy revisited 105
security within multimedia networked conferencing 419

Compliance
an initial plan of action for compliance with the UK's Data Protection Act 1998 23
year 2000 update 113

Computer crime
computer hacking and cyber terrorism: the real threats in the new millennium? 28

0167-4048/00$20.00 © 2000 Elsevier Science Ltd. All rights reserved

I-Way robbery: crime on the Internet 211

Computer fraud
I-Way robbery: crime on the Internet 211

Computer systems
computer crime and abuse: a survey of public attitudes and awareness 715
computer security - what should you spend your money on? 322
one down, one to go 19
year 2000 update 113

Conferences
security within multimedia networked conferencing 419
step into a secure new world - Compsec '99 Report 660

Confidentiality
E-mail can seriously damage your health 396
surviving denial of service 124

Conflict
risks in low trust among trading partners in electronic commerce 587

Contingency planning
Y2K contingency planning: taking BCM into the 21st century 693
year 2000 update 113

Control
are you in control? 199
encryption - do or die for UK business 312
implicit trust in the risk assessment process of EDI 317
the bell tolls for the bell-shaped curve 565

Corruption
are you in control? 199

Costs
simulating cyber attacks, defences, and consequences 479

Crime
computer crime and abuse: a survey of public attitudes and awareness 715
I-Way robbery: crime on the Internet 211
telecommunications crime - part 1 577
telecommunications crime - part 2 683

Criteria
firewall certification 165

Cryptography
a structured symmetric-key block cipher 134
generating user-based cryptographic keys and random numbers 619
PKI, elliptic curve cryptography, and digital signatures 47
state-of-the-art ciphers for commercial applications 67

Cyber crime
cyber-crime the US experience 16

Cyber space
employers and the Internet: legal woes and concerns 303
malware: Troy revisited 105

Cyber terrorism
computer hacking and cyber terrorism: the real threats in the new millennium? 28

Data collaboration
security within multimedia networked conferencing 419

Data protection
an initial plan of action for compliance with the UK's Data Protection Act 1998 23

Defamation
E-mail can seriously damage your health 396
employers and the Internet: legal woes and concerns 303

Digital signatures
E-commerce and encryption: barriers to growth 429
PKI, elliptic curve cryptography, and digital signatures 47
step into a secure new world - Compsec '99 Report 660
the emergence of a legal framework for electronic transactions 423
trusted third party services for deploying secure telemedical applications over the WWW 627

Disasters
the bell tolls for the bell-shaped curve 565

Disclaimers
E-mail can seriously damage your health 396

Discrete logarithms
PKI, elliptic curve cryptography, and digital signatures 47

Distributed generation
certificate inter-operability - white paper 221

Documentation
certificate inter-operability - white paper 221

E- commerce
PKI, elliptic curve cryptography, and digital signatures 47

E-commerce
E-commerce and encryption: barriers to growth 429
encryption - do or die for UK business 312
risks in low trust among trading partners in electronic commerce 587
step into a secure new world - Compsec '99 Report 660

Subject Index Vol. 18

E-mail
E-mail can seriously damage your health 396
Internet E-mail risks and concerns 409
macro attacks: what next after Melissa? 391

Electronic data interchange (EDI)
implicit trust in the risk assessment process of EDI 317

Electronic data processing (EDP)
computer security - what should you spend your money on? 322

Electronic signatures
step into a secure new world - Compsec '99 Report 660

Electronic transactions
the emergence of a legal framework for electronic transactions 423

Elliptic curve cryptosystems (ECC)
PKI, elliptic curve cryptography, and digital signatures 47

Employees
malware: Troy revisited 105

Employers
employers and the Internet: legal woes and concerns 303

Encryption
a structured symmetric-key block cipher 134
E-commerce and encryption: barriers to growth 429
encryption - do or die for UK business 312
generating user-based cryptographic keys and random numbers 619
hash-based encryption system 345
security within multimedia networked conferencing 419

Ethics
cyber-crime the US experience 16

Euro
one down, one to go 19

EUROMED
trusted third party services for deploying secure telemedical applications over the WWW 627

Europe
one down, one to go 19

Evaluation
firewall certification 165
network based intrusion detection: a review of technologies 671

Exports
encryption - do or die for UK business 312

Failures
year 2000 update 113

Finance
one down, one to go 19

Firewalls
developing firewall technology: Hardwall - white paper 471
E-mail can seriously damage your health 396
enforcing network security: a real case study in a research organization 533
firewall certification 165
Internet E-mail risks and concerns 409
security within multimedia networked conferencing 419

Flaming
Internet E-mail risks and concerns 409

Forgery
Internet E-mail risks and concerns 409

Formal evaluation
computer security - what should you spend your money on? 322

Fraud
I-Way robbery: crime on the Internet 211
telecommunications crime - part 1 577
telecommunications crime - part 2 683

Free speech
E for exponential growth 295

Future
the bell tolls for the bell-shaped curve 565

Hackers
computer crime and abuse: a survey of public attitudes and awareness 715
computer hacking and cyber terrorism: the real threats in the new millennium? 28
developing firewall technology: Hardwall - white paper 471
E-mail can seriously damage your health 396
hackers: freedom fighters of the 21st century 573
Internet E-mail risks and concerns 409
step into a secure new world - Compsec '99 Report 660

Hardwall
developing firewall technology: Hardwall - white paper 471

Hash functions
hash-based encryption system 345
state-of-the-art ciphers for commercial applications 67

Health
E-mail can seriously damage your health 396
trusted third party services for deploying secure telemedical applications over the WWW 627
year 2000 update 113

Hoaxes
step into a secure new world - Compsec '99 Report 660

I-way
I-Way robbery: crime on the Internet 211

ICSA
firewall certification 165

Information
policy groups 351
simulating cyber attacks, defences, and consequences 479
the revised version of BS7799 - so what's new? 307

Information systems
trusted third party services for deploying secure telemedical applications over the WWW 627

Information technology (IT)
computer crime and abuse: a survey of public attitudes and awareness 715
firewall certification 165
Y2K contingency planning: taking BCM into the 21st century 693
year 2000 update 113

Information warfare
computer hacking and cyber terrorism: the real threats in the new millennium? 28

Insurance
certificate interoperability - white paper 221

Integrity
developing firewall technology: Hardwall - white paper 471
surviving denial of service 124

Intellectual property
employers and the Internet: legal woes and concerns 303

Internet
computer hacking and cyber terrorism: the real threats in the new millennium? 28
E for exponential growth 295
E-mail can seriously damage your health 396
employers and the Internet: legal woes and concerns 303
I-Way robbery: crime on the Internet 211
Internet E-mail risks and concerns 409
malware: Troy revisited 105
surviving denial of service 124
the emergence of a legal framework for electronic transactions 423

Inter-organisational relationships
risks in low trust among trading partners in electronic commerce 587

Intranets
managing multi level security in a military intranet environment 257

Intrusion detection
computer security - what should you spend your money on? 322
network based intrusion detection: a review of technologies 671

ISP
surviving denial of service 124

ITSEC
computer security - what should you spend your money on? 322
firewall certification 165

Java
managing multi level security in a military intranet environment 257

Legal issues
E-commerce and encryption: barriers to growth 429
employers and the Internet: legal woes and concerns 303
I-Way robbery: crime on the Internet 211
Internet E-mail risks and concerns 409
no surprises in Melissa land 300
survival is not compulsory: an introduction to business continuity planning 35
the emergence of a legal framework for electronic transactions 423
the revised version of BS7799 - so what's new? 307
trusted third party services for deploying secure telemedical applications over the WWW 627

Legislation
cyber-crime the US experience 16

MAC (message authentication code) algorithms
state-of-the-art ciphers for commercial applications 67

Macros
macro attacks: what next after Melissa? 391

Malware
malware: Troy revisited 105

Management
malware: Troy revisited 105

Medical information system
trusted third party services for deploying secure telemedical applications over the WWW 627

Melissa
E-mail can seriously damage your health 396
macro attacks: what next after Melissa? 391
no surprises in Melissa land 300

Subject Index Vol. 18

Meters
telecommunications crime - part 1 577

Microsoft Office 97
the problems of WordMacro virus upconversion 241

Microsoft Word 97
the problems of WordMacro virus upconversion 241

Military environment
managing multi level security in a military intranet environment 257

Military intelligence
one down, one to go 19

Modelling
simulating cyber attacks, defences, and consequences 479

Monitoring
E-mail can seriously damage your health 396
malware: Troy revisited 105

MPNA
Shannon, TESPAR and approximation strategies 445

Multimedia
security within multimedia networked conferencing 419

Natural disasters
survival is not compulsory: an introduction to business continuity planning 35

Networks
enforcing network security: a real case study in a research organization 533
network based intrusion detection: a review of technologies 671
security within multimedia networked conferencing 419
Shannon, TESPAR and approximation strategies 445

Obscene conduct
employers and the Internet: legal woes and concerns 303

Onion routing
managing multi level security in a military intranet environment 257

Opportunistic behaviour
risks in low trust among trading partners in electronic commerce 587

Passwords
developing firewall technology: Hardwall - white paper 471
password authentication schemes with smart cards 727

Patents
employers and the Internet: legal woes and concerns 303

Path context model (PCM)
managing multi level security in a military intranet environment 257

Penetration testing
computer security - what should you spend your money on? 322

Performance testing
network based intrusion detection: a review of technologies 671

Planning
survival is not compulsory: an introduction to business continuity planning 35
Y2K contingency planning: taking BCM into the 21st century 693
year 2000 update 113

Policy
E-mail can seriously damage your health 396
Internet E-mail risks and concerns 409
policy groups 351

Prediction
the bell tolls for the bell-shaped curve 565

Privacy
E for exponential growth 295
malware: Troy revisited 105

Private keys
trusted third party services for deploying secure telemedical applications over the WWW 627

Protection
developing firewall technology: Hardwall - white paper 471
simulating cyber attacks, defences, and consequences 479
surviving denial of service 124

Public key infrastructures (PKI)
PKI, elliptic curve cryptography, and digital signatures 47
step into a secure new world - Compsec '99 Report 660

Public keys
certificate inter-operability - white paper 221
generating user-based cryptographic keys and random numbers 619
hash-based encryption system 345
trusted third party services for deploying secure telemedical applications over the WWW 627

Questionnaires
year 2000 update 113

Random number generation
generating user-based cryptographic keys and random numbers 619
hash-based encryption system 345

Reports
network based intrusion detection: a review of technologies 671

Research
enforcing network security: a real case study in a research organization 533

Risk
employers and the Internet: legal woes and concerns 303
Internet E-mail risks and concerns 409
risks in low trust among trading partners in electronic commerce 587
year 2000 update 113

Risk analysis
Y2K contingency planning: taking BCM into the 21st century 693

Risk assessment
implicit trust in the risk assessment process of EDI 317

Risk management
computer security - what should you spend your money on? 322
survival is not compulsory: an introduction to business continuity planning 35

RSA
PKI, elliptic curve cryptography, and digital signatures 47

Safety
telephone tales 120

Sampling
Shannon, TESPAR and approximation strategies 445

Secrecy
encryption - do or die for UK business 312

Security
computer hacking and cyber terrorism: the real threats in the new millennium? 28
computer security - what should you spend your money on? 322
developing firewall technology: Hardwall - white paper 471
enforcing network security: a real case study in a research organization 533
Internet E-mail risks and concerns 409
malware: Troy revisited 105
managing multi level security in a military intranet environment 257
password authentication schemes with smart cards 727
PKI, elliptic curve cryptography, and digital signatures 47
policy groups 351
security within multimedia networked conferencing 419
telephone tales 120
the revised version of BS7799 - so what's new? 307
trusted third party services for deploying secure telemedical applications over the WWW 627
Windows NT security: kudos, concerns, and prescriptions 204

Service
E-mail can seriously damage your health 396
surviving denial of service 124

Sexual harassment
E-mail can seriously damage your health 396

Shannon
Shannon, TESPAR and approximation strategies 445

Simulation
simulating cyber attacks, defences, and consequences 479

Smart cards
password authentication schemes with smart cards 727

Software
computer security - what should you spend your money on? 322
developing firewall technology: Hardwall - white paper 471
enforcing network security: a real case study in a research organization 533
Internet E-mail risks and concerns 409
state-of-the-art ciphers for commercial applications 67

Spamming
E-mail can seriously damage your health 396

Spoofing
Internet E-mail risks and concerns 409

Standardisation
PKI, elliptic curve cryptography, and digital signatures 47

Survival
survival is not compulsory: an introduction to business continuity planning 35
surviving denial of service 124

Symmetric key
a structured symmetric-key block cipher 134
generating user-based cryptographic keys and random numbers 619
hash-based encryption system 345

Subject Index Vol. 18

TCSEC
firewall certification 165

Techno-terror
telecommunications crime - part 2 683

Telecommunications
telecommunications crime - part 1 577
telecommunications crime - part 2 683

Telephones
telephone tales 120

TESPAR
Shannon, TESPAR and approximation strategies 445

Testing
network based intrusion detection: a review of technologies 671

Third party services
trusted third party services for deploying secure telemedical applications over the WWW 627

Threats
computer hacking and cyber terrorism: the real threats in the new millennium? 28
macro attacks: what next after Melissa? 391
step into a secure new world - Compsec '99 Report 660

Time bomb
macro attacks: what next after Melissa? 391

Trademarks
employers and the Internet: legal woes and concerns 303

Trading partner's trust
implicit trust in the risk assessment process of EDI 317

Training
cyber-crime the US experience 16
survival is not compulsory: an introduction to business continuity planning 35
telephone tales 120

Trojan Horse
malware: Troy revisited 105

Trust
implicit trust in the risk assessment process of EDI 317
risks in low trust among trading partners in electronic commerce 587
trusted third party services for deploying secure telemedical applications over the WWW 627

Uncertainty
risks in low trust among trading partners in electronic commerce 587

Validation
simulating cyber attacks, defences, and consequences 479

Value-added networks (VANs)
implicit trust in the risk assessment process of EDI 317

Verification
certificate inter-operability - white paper 221
password authentication schemes with smart cards 727
security within multimedia networked conferencing 419

Viruses
computer crime and abuse: a survey of public attitudes and awareness 715
developing firewall technology: Hardwall - white paper 471
E-mail can seriously damage your health 396
Internet E-mail risks and concerns 409
macro attacks: what next after Melissa? 391
no surprises in Melissa land 300
step into a secure new world - Compsec '99 Report 660
the problems of WordMacro virus upconversion 241

Vulnerabilities
computer security - what should you spend your money on? 322

Windows NT
Windows NT security: kudos, concerns, and prescriptions 204

WordMacro
the problems of WordMacro virus upconversion 241

World Wide Web
trusted third party services for deploying secure telemedical applications over the WWW 627

Year 2000
step into a secure new world - Compsec '99 Report 660
Y2K contingency planning: taking BCM into the 21st century 693
year 2000 update 113
